1.0 Introduction

1.1 Purpose of The Document

This document presents a comprehensive overview of the seminar titled "Unlocking the Power of AI in Data Analytics," an initiative by Universiti Teknologi Malaysia (UTM) aimed at empowering students and professionals with practical knowledge and skills in artificial intelligence (AI) and data analytics. The seminar is scheduled to take place on 26 June 2025, from 9:00 AM to 3:30 PM, at Dewan Kejora, N28a, and will be conducted by none other than Dr. Lau Cher Han, a renowned Chief Data Scientist and mentor known for his extensive experience and impactful contributions in the fields of data science, machine learning, and AI.

This seminar is specifically designed to provide participants with hands-on exposure to modern AI tools and technologies, particularly using Google Colab, a popular cloud-based platform for coding and data analysis. Attendees will learn how to apply AI tools to analyze real-world datasets, gaining practical insights into how data-driven decisions are made across industries. Moreover, the session will cover best practices for interpreting and presenting data using AI techniques which is an essential skill for anyone aspiring to enter the data-driven workforce.

One of the key objectives of the seminar is to bridge the gap between theoretical knowledge and real-world application. By incorporating practical exercises, demonstrations, and expert guidance, the seminar offers a rare opportunity for participants to enhance their analytical thinking and problem-solving skills. This experience will not only strengthen their academic and professional portfolios but also significantly improve their readiness for industry roles that require data literacy and AI proficiency.

Additionally, the event includes several key benefits that make participation especially rewarding. These include gaining hands-on experience, boosting one's resume, access to free tools, and receiving a certificate of participation that validates the skills acquired. Furthermore, the seminar encourages community engagement and networking, allowing attendees to connect with peers and industry professionals who share similar interests in AI and analytics.

The presence of Dr. Lau Cher Han as the keynote speaker adds tremendous value to the seminar. With a track record of mentoring aspiring data professionals and contributing to educational and industry-based AI initiatives, his guidance is expected to deeply enrich the learning experience. His approachable style and real-world case study discussions will enable participants to understand complex AI concepts in a simplified and relatable manner.

This document also outlines the organizational structure behind the seminar, detailing the roles and responsibilities of committee members to ensure a smooth and efficient execution. From technical arrangements to on-site support and emergency protocols, every aspect has been carefully planned to create a seamless and engaging learning environment for all attendees.

In summary, the *"Unlocking the Power of AI in Data Analytics"* seminar is a thoughtfully curated event that seeks to inspire, educate, and equip participants with the tools and confidence needed to thrive in the rapidly evolving field of data analytics. By combining expert-led instruction, hands-on practice, and valuable networking opportunities, this seminar stands out as a meaningful and impactful experience for all who attend.

1.2 Objectives

The primary objective of the *"Unlocking the Power of AI in Data Analytics"* seminar is to equip participants with foundational knowledge and practical skills in the application of Artificial Intelligence (AI) within the domain of data analytics. As the volume and complexity of data continue to grow, there is an increasing demand for innovative tools and methods to derive meaningful insights. This seminar aims to address this need by introducing participants to AI-powered techniques that can enhance the efficiency and effectiveness of data analysis processes.

A key focus of the seminar is to provide hands-on exposure to widely accessible platforms such as Google Colab. Participants will engage in guided activities that involve the use of AI tools to analyze real-world datasets. Through these practical sessions, they will gain experience in implementing AI models and algorithms to uncover patterns, trends and insights from complex data.

In addition to technical implementation, the seminar emphasizes the importance of accurately interpreting and clearly presenting AI-generated results. Participants will be introduced to best practices in data visualization, interpretation and storytelling, enabling them to communicate their findings in a coherent and impactful manner. This is essential not only for academic research but also for professional decision-making contexts where data-driven insights must be conveyed to diverse stakeholders.

Ultimately, the seminar seeks to foster analytical thinking and technological competence among students, researchers and professionals. By the end of the session, participants are expected to possess a clearer understanding of how AI can be strategically applied in data analytics and be better prepared to integrate these tools into their academic projects, research endeavors, or professional workflows.

1.3 List of Activities

Opening Keynote: *The AI-Driven Data Revolution*

The speaker, Dr. Lau Cher Han kickstarts the event by exploring the real-world impact of AI on data analytics across industries including healthcare, finance and marketing

Technical Workshop: Hands-On with AI Tools

Dr. Lau will conduct a live coding session to guide students in a mini-project, which is sentiment analysis using Python, Scikit-learn, Pandas and Hugging Face.

Panel Discussion: “Challenges and Ethics in AI-Driven Analytics”

Leading experts from University of Technology Malaysia (UTM) and the speaker, Dr. Lau will explore the critical ethical and societal questions surrounding AI in data analytics. Experts from UTM’s Faculty of Artificial Intelligence, Dr. Nor Zairah Ab. Rahim, Dr. Nooraini Othman, and Dr. Shadiya Mohamed Saleh Ba Qutayan will discuss pressing issues such as algorithmic bias, transparency, AI hallucinations, and privacy regulations.

Networking & Closing Session

The seminar will conclude with a networking and closing session, offering a valuable opportunity for students, faculty members, and the invited speaker to engage in informal discussions and build professional connections. Attendees will be invited to enjoy light refreshments while interacting with peers and experts, initiating collaboration and continued learning beyond the seminar. In addition, there will be a photo booth with AI-themed props, allowing participants to capture memorable moments and celebrate the event's success in a fun, engaging way.

1.4 Targeted Audience and Potential Participants

The "Unlocking the Power of AI in Data Analytics" seminar aims to engage a wide range of participants, including students, academics, and individuals who are interested in the expanding role of artificial intelligence in data analytics in the digital age. The primary goal is to foster a collaborative and interactive learning environment where participants can explore how AI is transforming data analysis and decision-making across various fields.

Although the seminar is open to all students from Universiti Teknologi Malaysia (UTM) as well as other institutions, the primary target audience is Year 3 and Year 4 students from the Faculty of Computing, as they are at a crucial stage in shaping their academic and career paths. This seminar offers valuable exposure to real-world applications of AI in data analysis that can inspire their potential career directions. Additionally, Year 1 and Year 2 students with an emerging interest in AI data analytics are encouraged to attend to build the foundational knowledge and discover early opportunities for growth.

The seminar also welcomes participation from students of other institutions, promoting inter-university engagement. Potential participants include both undergraduate and postgraduate students, as well as research students from UTM and other universities with a keen interest in AI data analytics. Academic staff, including lecturers, professors, and so on, can benefit from the seminar through first-hand exposure to current developments in AI data analytics that may enhance their teaching and research practices. AI or data enthusiasts, including hobbyists, self-learners, and professionals from various fields, are also encouraged to attend to broaden their knowledge and connect with like-minded individuals.

1.5 Technical Aspects of The Programme

The *Artificial Intelligence 25* was held on 26th June 2025 at Dewan Kejora, located in N28a, Universiti Teknologi Malaysia (UTM). The seminar, titled "Unlocking the Power of AI in Data Analytics," was led by Dr. Lau Cher Han, a renowned Chief Data Scientist and Mentor. The session aimed to empower participants with the knowledge and skills to implement AI tools in Google Colab for analyzing real-world datasets and effectively presenting data using best practices.

To ensure a smooth and impactful seminar experience, various technical aspects were carefully managed. The venue was equipped with high-quality audio-visual systems, including projectors, screens, microphones, and speakers, to support engaging presentations. High-speed internet connectivity was also provided to facilitate live demonstrations and seamless access to cloud-based AI tools.

Presenters created their slides using Canva, a user-friendly design platform that allowed for visually appealing and multimedia-rich content. For sessions involving live AI demonstrations, the required software, hardware, and high-performance laptops were made available. Additionally, contingency plans, such as backup files and devices, were prepared in case of technical emergencies.

Interactive Q&A sessions were made easy and inclusive with the use of wireless microphones, enabling participants to engage directly with the speakers. Breaks and designated areas were organized to encourage networking, collaboration, and the exchange of contact information among attendees.

To add excitement to the seminar, lucky draw sessions were conducted using a pre-existing online tool that randomly selected winners from the participant list. This fun and fair approach helped maintain participant interest and promoted active engagement throughout the event.

Overall, the seminar provided a professional, interactive, and educational environment for learning and collaboration. Participants walked away with hands-on experience, useful AI tools, a certificate of participation, and valuable opportunities for networking and professional growth.

2.0 Guest Speaker Background

To ensure that participants gain valuable insights from both theoretical and practical perspectives, this seminar features an expert speaker with substantial experience in the field of Artificial Intelligence. The invited speaker brings a wealth of academic knowledge and industry-relevant expertise that will enrich the learning experience of all attendees.

DR. LAU CHER HAN

Associate Professor at LEAD, Dr. Lau Cher Han is a renowned figure in the AI community. His research specializes in machine learning and data analytics, and he is widely recognized for his ability to translate complex concepts into practical applications. Dr. Lau is also known for his engaging teaching approach, which effectively bridges the gap between academic theory and real-world implementation. His expertise and experience make him an ideal speaker to guide participants in exploring the power of AI in modern data analytics.

3.0 Impact of The Programme

3.1 Impact to The Organizer

The Unlocking the Power of AI in Data Analytics seminar had a significant positive impact on the organizer, enhancing both institutional reputation and operational capabilities. Hosting a high-quality seminar at Universiti Teknologi Malaysia (UTM) positioned the university as a proactive leader in AI education and innovation, reinforcing its commitment to staying at the forefront of digital and technological advancements.

Organizing the seminar provided the team with valuable experience in managing a technically demanding event. The successful coordination of venue setup, advanced audio-visual support, live AI tool demonstrations, and interactive elements such as Q&A sessions and lucky draws showcased the organizer's ability to deliver a professional, engaging, and seamless event. This experience also strengthened internal collaboration and boosted team confidence in executing future large-scale programmes.

Additionally, the event served as a platform for building strategic networks with industry experts, guest speakers, and participants from diverse backgrounds. This not only opened doors for future collaborations and partnerships but also enriched the organizer's outreach and visibility within the academic and professional communities.

Furthermore, the positive feedback and active participation from attendees validated the relevance and effectiveness of the seminar content, motivating the organizing team to plan similar initiatives in the future. The success of this programme has laid a strong foundation for the university to expand its influence in AI-related fields through future events, research, and training programmes.

The seminar requires extensive planning, coordinating, and executing, which greatly increases the committee members' skill set in organizing seminars. Through meticulous schedule preparation, efficient resource management, and coordination with vendors and speakers, the organizer acquired invaluable expertise in event management. Through public speaking, conflict solving, networking, and creating promotional materials, they enhance their communication skills. They become more proficient at recognising and resolving problems, adjusting to changes, and coming up with creative solutions as they grow. Handling audio-visual equipment can also strengthen technical setup abilities. In general, this experience strengthens their networking, time management, and leadership abilities, increasing their competence and self-assurance in their professional lives.

To sum up, the event had a significant influence on the organizers, improving their standing and offering beneficial networking chances. It also greatly enhanced their abilities for collaboration, communication, and seminar organization. With these improved capabilities, the organizers will be able to accelerate their professional development and have a beneficial impact on their organization. The organizers have improved their ability to manage the demands of a dynamic and constantly evolving workplace by honing these abilities, which will help them be well-prepared for their future careers. Their confidence is increased by this intensive skill development, which also positions them as competent and flexible leaders in their industry.

3.2 Impact to The Participants

Introducing and Deepening Understanding of AI-Driven Data Analytics:

Even though some participants may already have a basic understanding of artificial intelligence (AI) or data analytics, this seminar provides an essential opportunity to introduce and deepen knowledge about how AI can be effectively applied within data analytics. Rather than focusing solely on theoretical aspects of AI, the session highlights the integration of AI techniques within data analytics workflows – demonstrating how algorithms such as classification, clustering, and predictive modeling can be effectively applied to transform raw datasets into actionable insights. Participants will be introduced to core concepts that connect AI with modern data analysis, such as automation in data processing, pattern recognition, and evidence-based decision-making across various domains. This approach bridges any existing knowledge gaps and helps participants, regardless of their prior experience, to better appreciate the practical applications of AI in tackling analytical problems and supporting data-driven strategies in academic, professional, and research settings.

Building Practical AI and Data Analytics Skills:

Beyond theoretical knowledge, the seminar provides attendees with practical, hands-on exposure to tools commonly used in the field of AI-driven data analytics. Participants may engage with platforms such as Python, utilizing key libraries like Pandas, NumPy, Matplotlib, and Scikit-learn to data cleaning, model training, and result visualization. They may also explore tools like Power BI with AI features or Google Colab for collaborative coding. Through real or simulated datasets, participants will learn how to prepare data, apply AI algorithms, and interpret analytical outputs. Through guided exercises and tool demonstrations, participants will build a stronger grasp of how AI can be applied in real analytical workflows. This practical experience not only builds technical skills but also enhances analytical thinking, preparing participants to apply AI techniques effectively in academic, research, or career-related contexts.

Exploring Career and Academic Opportunities in Data Analytics:

Raising participants' knowledge of how the rise of AI in data analytics is changing industries is another important function of the conference. The seminar also serves as a gateway for participants to discover career and academic developments related to data analytics. For Year 3 students and above, the insights provided help connect classroom knowledge to industry applications, showing how roles such as data analyst, data scientist, business intelligence developer, or AI engineer are evolving in the workforce. Guest speakers and real-world examples give context to what skills are in demand and how students can tailor their academic choices, final-year projects, internships or even future career accordingly. For younger students in Year 1 or Year 2, the seminar acts as an early motivator, helping them discover potential career pathways in the rapidly growing technology field of AI-powered analytics and guiding their learning journey from an informed perspective.

4.0 Program Tentative

Time	Activity
9.00 am - 9.30 am	Arrival of Audience
9.30 am - 9.35am	Recitation of Doa by committe member
9.35 am - 9.45 am	Opening Remarks & Welcome Speech from Seminar Director
9.45 am - 10.15 am	Keynote Speech : <i>The AI-Driven Data Revolution</i>
10.15 am - 11.15am	Panel Discussion: <i>Challenges and Ethics in AI-Driven Analytics</i>
11.15 am - 11.45 am	Q&A Session with Panelists
11.45 am - 12.45 pm	Lunch Break
12.45 pm - 2.45pm	Hands-On Workshop : AI-Powered Data Analysis Tools
2.45 pm - 3.00 pm	Closing Remarks and Group Photo

5.0 Organizing Committee

6.0 Proposed Budget (MYR)

Expenses	Total
Venue: Rental of N28A Kejora Hall	RM500
Speakers: 1. Dr. Lau Cher Han	RM150
Audio-Visual Equipment: Microphones, Speakers, Projectors	RM200
Refreshments for speakers: Morning and Afternoon Tea	RM250
Materials and Supplies: 1. Printing (seminar materials) 2. Banner 3. Tables and chair for booth	RM200
Marketing and Promotion: Online Advertising and Poster	RM200
Contingency Fund(10%): Miscellaneous Expenses	RM130
Total	RM1430

7.0 Conclusion

In a nutshell, the proposal outlines all the essential components for the upcoming seminar, including its purpose and objectives, target audience, guest speaker, impact, and program schedule. The seminar titled “Unlocking the Power of AI in Data Analytics,” scheduled to be held on 26th June 2025 at Dewan Kejora, Universiti Teknologi Malaysia (UTM). Led by the esteemed Dr. Lau Cher Han, the seminar aims to introduce participants – particularly students from Faculty of Computing – to the transformative potential of artificial intelligence in the field of data analytics. Through engaging content, real-world applications, and exposure to expert insights, the event is expected to deepen understanding, develop practical skills, and inspire future academic and professional pursuits. We believe this seminar will serve as a valuable platform for participants to broaden their perspectives on AI, sharpen their analytical thinking, and explore emerging opportunities in this data-driven world. Furthermore, organizing the event will lead the committee with a meaningful opportunity to foster teamwork, communication, and leadership capabilities. With thorough planning and strong collaboration, we are confident that this seminar will achieve its intended goals and leave a lasting impact on everyone involved.

Appendix A: Programme Tentative

Time	Activity
9.00 am - 9.30 am	Arrival of Audience
9.30 am - 9.35am	Recitation of Doa by committe member
9.35 am - 9.45 am	Opening Remarks & Welcome Speech from Seminar Director
9.45 am - 10.15 am	Keynote Speech : <i>The AI-Driven Data Revolution</i>
10.15 am - 11.15am	Panel Discussion: <i>Challenges and Ethics in AI-Driven Analytics</i>
11.15 am - 11.45 am	Q&A Session with Panelists
11.45 am - 12.45 pm	Lunch Break
12.45 pm - 2.45pm	Hands-On Workshop : AI-Powered Data Analysis Tools
2.45 pm - 3.00 pm	Closing Remarks and Group Photo

Appendix B: Organising Committee

Appendix C: Committee Name List

Name	Matric No.	Position
ELIJAH SHE YU SHENG	A23CS0073	Director
SABRINA HENG WEI QI	A23CS0265	Secretary
BRENDAN CHIA YAN FEI	A23CS0211	Project Manager
GUI KAH SIN	A23CS0080	Treasurer
WOO CHENG SHUAN	A23CS0283	Event Planner

Appendix D: Team Member Contribution

ELIJAH SHE YU SHENG (Director)

Elijah is the overall leader and final decision-maker of the seminar. He oversees all departments to ensure tasks align with the seminar's goals and deadlines, approves final budgets, agendas, and content, and provides the vision, direction, and objectives necessary for the seminar's success.

SABRINA HENG WEI QI (Secretary)

Sabrina is responsible for recording meeting minutes and maintaining detailed records. Additionally, she handles all follow-ups with speakers, panelists, and sponsors, as well as schedules meetings and coordinates timelines to keep the team organized.

BRENDAN CHIA YAN FEI (Project Manager)

Brendan breaks down the project into manageable phases with specific milestones and deadlines, ensures that tasks are appropriately assigned and completed on time across all teams, coordinates rehearsal timelines and real-time event flow, and maintains regular check-ins with each team to monitor progress.

GUI KAH SIN (Treasurer)

Gui prepares and manages the overall budget. She tracks all income and expenditures, issues payments for the venue, food, and materials, and presents detailed financial reports to the Director and faculty advisors.

WOO CHENG SHUAN (Event Planner)

Woo is in charge of planning the venue layout and decorations. He ensures smooth registration, guest seating, and crowd flow during the event, and oversees the setup and dismantling process before and after the seminar.
