Article:

JOHOR BAHRU, June 2025 – On June 26th, 2025, the " Faculty of Computing Research & Innovation Day (FCRI 2025) " was held at N28A, Kejora Hall, from 8:00 a.m. to 5:00 p.m. This event, part of the SECD3761 - Technopreneurship Seminar course, brought together industry experts, academics, and students to explore the intersection of AI and content creation. With a focus on fostering innovation and entrepreneurship, the seminar provided practical learning opportunities through insightful talks, interactive discussions, and networking sessions. Other than that, the seminar featured engaging sessions, exciting showcases, and a delightful array of food trucks. Participants had the opportunity to hear from professional speakers, explore booths showcasing the latest AI technologies, and enjoy a variety of delicious treats.

The primary objectives of the FCRI were to explore and discover AI technology and gain insights from professionals. Attendees delved into the latest advancements in AI, understanding its applications and witnessing real-world examples of its transformative impact on various industries. Expert speakers shared their knowledge and experiences on how AI is revolutionizing content creation, providing valuable insights for attendees.

One of the highlights of the seminar was the industry talk featuring prominent speakers: **Dr Yeong Chee Fai**, CEO of DF Automation & Robotics Sdn Bhd; Mr **Chan Weng Hun**, Head of Cloud Core of Huawei Technologies (Malaysia) Sdn Bhd; and Mr **Russell Marland**, Senior Operations Director of TG Human Resource Management Sdn Bhd. Although Mr **Muhammad**

Usman, CEO of Embedded LLM Sdn Bhd; and **Dr Mazlan Abbas**, CEO of Favoriot Sdn Bhd, were originally scheduled to speak, they were unable to attend due to unforeseen personal commitments.

The seminars was taken place in Dewan Kejora and Hyflex Classroom, N28a. The panel discussed cutting-edge technologies, such as stable diffusion, and their utilization in enhancing content creation processes. This discussion offered attendees a deeper understanding of the practical applications of AI in creating innovative and engaging content.

During the Technopreneurship Seminar, five prominent companies in Malaysia set up booths to engage with participants and showcase their expertise. **NexScholar** introduced their latest educational platforms and digital resources aimed at enhancing student learning experiences through technology. **Huawei Asia Pacific Recruitment** presented diverse career opportunities within their globally leading ICT and telecommunications sectors, encouraging students to explore roles in innovation and connectivity. **TG Recruitment Agency**, one of Malaysia's top recruitment firms, offered insights into local and international manpower solutions, connecting job seekers to various industries including IT, sales and marketing. **MSC Cyberport**, a public-private partnership driven by the Johor State Government, highlighted their initiatives to create a global ICT business hub while fostering innovation and growth for local startups. Lastly, **Jupiterobot** captivated attendees with their advanced robotics technologies, demonstrating how automation and AI solutions can transform multiple industries in Malaysia and beyond. Through this showcase, participants learned about emerging technological trends, career pathways, startup support opportunities and innovative solutions in the market, equipping them with valuable knowledge and networks to prepare for their future careers and entrepreneurial pursuits.

The seminar, along with events like the e-game competition and AI Ideathon, faced various challenges, particularly in managing time, ensuring teamwork, and incorporating new technologies. They organizing the schedules and coordinating the timing of each session demanded careful planning, while maintaining clear communication and cooperation among multiple teams was vital to avoid any interruptions. Moreover, they integrate advanced AI tools smoothly into the programme was not easy and required strong technical support. To tackle these issues, the organizers developed thorough schedules with extra time allowances, set up efficient communication systems, and arranged training and technical assistance for both staff and participants. These solutions ensured that the events ran seamlessly and participants could engage effectively with the technologies presented. Overall, the experience highlighted how crucial detailed planning, teamwork, clear communication, and adaptability are for running successful events that integrate modern technological advancements. Overall, the event delivered a comprehensive and enriching experience, paving the way for continued advancements in the intersection of AI and content creation.

Reflection Essay – ELIJAH SHE YU SHENG A23CS0073

My name is ELIJAH SHE YU SHENG, and I am the leader of Group 24, part of the Technical Team from Section 01, SECD3761 – Technopreneurship Seminar. I also had the honour of leading my team during the Faculty of Computing Research & Innovation Day (FCRI 2025). As the leader, my responsibilities encompassed managing my team and overseeing the entire showcase execution to ensure every aspect aligned with our objectives.

As the leader of the showcase team, my primary responsibilities included ensuring the smooth flow of the showcase and assisting in the full booth setup. Our role as the Technical Team was to ensure all necessary items and facilities such as fans, tables, and chairs were properly allocated in their respective places. Additionally, I helped to set up the showcase hub itself to ensure readiness for the event.

The event day was challenging as it involved not only the showcase but also the AI Ideathon and Food Truck event held at the same location on the same day. To complete all assigned tasks effectively, I adopted a collaborative and communicative approach by maintaining open lines of communication with all team leaders and members. I utilized a WhatsApp group to disseminate important information quickly and efficiently, ensuring everyone stayed updated with the latest developments.

During the event, all members were required to attend from start to end. We participated in the seminar at Kejora Hall where multiple speakers delivered inspiring talks, motivating us with their knowledge and experience. From this entire experience, I learned the importance of effective communication, meticulous planning, and adaptability. Being passionate and hardworking were key traits that helped me lead the team successfully.

In summary, the Faculty of Computing Research & Innovation Day (FCRI 2025) was a challenging yet rewarding experience. The key to our success was the collaborative effort of all team members, effective communication, and thorough planning. This experience enhanced my leadership and project management skills and deepened my understanding of teamwork and adaptability, which will be invaluable in my future endeavours.
